Skills Summary

- **Languages**: C++, Python, Java, SQL
- **Frameworks**: Flask, FastAPI, React, Tailwind CSS
- **Tools/Platforms**: Git, GitHub, MySQL, Firebase, Docker, Hugging Face, Render, Vercel
- **Core CS**: Data Structures & Algorithms, OOP, DBMS, Computer Networks, Operating Systems, System Design

Education

- **Bennett University** — Uttar Pradesh, India
  Bachelor of Technology - Computer Science and Engineering; CGPA: 9.43 — *August 2024 - May 2028*
- **Renaissance School** — Bulandshahr
  Intermediate; Percentage: 89.4% — *April 2022 - March 2024*
- **Sunrise Public School** — Siyana, Bulandshahr
  Matriculation; Percentage: 87% — *April 2020 - March 2022*

Experience

- **IBM SkillsBuild – Data Analytics with AI Internship | GitHub** — Remote
  Data Analytics Intern — *17 August 2026 – 30 September 2026*
  - **FraudLens Development**: Developed FraudLens, an AI-based financial transaction anomaly detection system using Python, Pandas, NumPy, and Scikit-learn to identify suspicious transactions in highly imbalanced financial data.
  - **Feature Engineering & Detection**: Engineered transaction and account-balance features and implemented an Isolation Forest pipeline to generate anomaly scores and export suspicious transactions for investigation.
- **Meta PyTorch OpenEnv Hackathon** — Bengaluru, India
  Team Lead & Student Developer — *April 2026*
  - **Team Leadership**: Led a team throughout the hackathon, coordinating development, task allocation, integration, and project presentation.
  - **AI Product Development**: Designed and developed an AI-powered interview coaching solution supporting mock interviews and personalized performance feedback.
  - **OpenEnv Integration**: Integrated an OpenEnv-compliant reinforcement learning environment to enable adaptive interview workflows and improve coaching personalization.

Projects

- **AI Powered Interview Coach**: GitHub | Live Demo
  Built and deployed a full-stack AI interview platform supporting text, audio, and video mock interviews, automated evaluation, personalized feedback, and performance analytics. Integrated an OpenEnv-compliant reinforcement learning environment for adaptive interview workflows and an ATS-based resume analysis pipeline for personalized coaching. Deployed the application on Hugging Face Spaces.
  Tech: Python, Flask, PyTorch, Scikit-learn, NLTK, OpenCV, Pandas, Matplotlib, JavaScript, Chart.js, OpenEnv
- **IntentWatch – AI Surveillance System**: GitHub
  Built a real-time AI surveillance system using YOLOv8, OpenCV, and FastAPI to detect suspicious activities, behavioral intent, and generate live security alerts. Integrated a RAG-based Ask AI feature to retrieve relevant recent alerts and provide context-aware responses.
  Tech: Python, FastAPI, YOLOv8, OpenCV, React, TypeScript, Tailwind CSS, RAG
- **VoiceShield – AI Voice Scam Detection System**: GitHub
  Developed an end-to-end AI voice analysis system for deepfake and scam detection using AASIST-based audio classification, speaker verification, and multilingual speech analysis. Deployed backend services on Render and ML inference on Hugging Face, integrating the deployed system into an Android APK.
  Tech: Python, PyTorch, AASIST, Hugging Face, XLM-RoBERTa, Scikit-learn, Render, Android

Achievements

- **Meta PyTorch OpenEnv Hackathon**:
  Selected among the top 800 teams from 31,000+ registered teams nationwide.
- **Smart BU Hackathon**:
  Secured Rank 256 among 600+ participating teams.
- **LeetCode**:
  Solved 300+ DSA problems covering arrays, linked lists, trees, graphs, and other core data structures.

Certifications

- NPTEL - Software Engineering
- Microsoft - Azure AI Fundamentals
- Microsoft - Fabric Data Engineer Associate
- Google - The Bits and Bytes of Computer Networking
